

Dear ACS Parents and Prospective ACS Parents,

I am glad you are considering Angelo Catholic School for next year. I would like to tell you of my family's ACS experience.

I have two children, one who attended ACS from first through sixth grade and one who started in PreK-4 and is currently attending Angelo Catholic School. At ACS, my older child made good grades and did fine. Now he is in a public junior high, and the teachers have told me they can tell an ACS student from other students. Not only is it apparent in the children's behavior, but also in their grades. ACS has done its job preparing our children not only to succeed, but also to excel when they enter the public school world. I personally know of former ACS students attending colleges such as Harvard, Stanford, and Notre Dame. I truly believe that the foundation each child received at Angelo Catholic School has been a big part of each child's success. I am positive their parents would agree.

I have had many concerns over the eight years we have been at ACS. However, when I look back at the overall picture of what my children have received and are receiving, I can honestly say that Angelo Catholic School was the best place for our family.

I am aware that many of you may say that you cannot afford the tuition. I challenge you on that as many of you have had to pay for childcare for four or five years. ACS also offers a tuition assistance program.

Please, prayerfully consider giving your child the quality education in the Christ-centered atmosphere of Angelo Catholic School. I personally promise you; you will be glad you did!

Very Sincerely In Christ,
Bob & Robin Kalvoda
